Finale®    PrintMusic    SongWriter    NotePad

## Adding Markings, Lyrics, and more - Continued

Notate bends, stair steps, double bends, pull-offs, hammer-ons and releases  
 Control the exact placement of each part of a beat  
 Hide key and time signatures when desired  
 Create chord-only charts  
 Create and edit text blocks on any view  
 Create custom TAB styles  
 Create "cue measures" using the Ossia tool  
 Specify tempo changes using the Tempo Tool  
 Support for: mezzo-soprano, baritone C, treble 8va, bass 8va, french violin, alternative percussion, blank clef  
 Define custom clefs  
 Place multiple clefs within measures  
 Flow text into and around irregularly-shaped graphics  
 Align and justify lyrics either globally or syllable by syllable  
 Create custom staves  
 Create custom articulations  
 Create flat beams  
 Hide/show ledger lines  
 Save time on repetitive tasks with the Add Again metatool

## Editing Tools

Full measures  
 Limited  
 Limited

Full measures  
 Limited  
 Limited

Select any group of notes for editing, including partial measures  
 View each window in any fashion desired (page or scroll view, magnification, and measure location)  
 Resize view from 5% to 1000%  
 Size and position tool palettes to fit the way you work  
 Cut, copy and paste text  
 Cut, copy and paste between windows  
 Reposition any symbol, character, graphic or text anywhere on the page simply by dragging it  
 Multiple Undo even past the last "Save"  
 Apply "smart articulations" with automatic positioning and stem direction sensitivity  
 Drag and drop dynamics and tempo markings  
 Respace notes to automatically avoid collisions of lyrics  
 Quickly manipulate any item using the Selection tool  
 Simultaneously view and edit multiple pages  
 Instrument doubling made easy

## Hearing Your Music

Standard style only

Play your score through a MIDI instrument, sound module, sound card or internal computer speaker  
 SmartMusic® SoundFont - 128 sounds included free

Human Playback® plays feeling, phrasing and nuance in a variety of styles

Play back repeats, dynamics, tempo changes and chord symbols  
 Play a note, chord, phrase, selected staves or an entire score  
 Define playback sounds of each staff, layer of music and/or chord symbols  
 Assign a MIDI channel or patch, and play/solo/mute setting for each staff  
 Map multiple staves to the same instrument sound  
 Row-Loft marching percussion sounds included  
 Play back as you played it - retaining your original MIDI performance including key velocity, pitch bend, rubato, and more  
 Program the percent of "swing feel" for playback  
 Percussion staves automatically plays back without extra configuration  
 Integrated Garritan® Aria Player™ with Ambience Reverb  
 More than 500 world-class Garritan instrument sounds for realistic playback  
 More than 100 concert and marching percussion sounds from Tapspace™ Virtual Drumline™  
 External sound library support (VST/AU instruments and effects)  
 Boomwhackers® tuned percussion tube sounds  
 Define/control playback of interpretive marks, text and shapes  
 Define your own scales and micro tonality  
 Assign a playback effect to any graphic  
 Control all aspects of playback, in one place, with the ScoreManager®

## Sharing your Music

Finale® PrintMusic SongWriter NotePad

## Composing and Arranging Time Savers

Finale®	PrintMusic	SongWriter	NotePad	
■	4 layers only	4 layers only	4 layers only	Define up to four layers of music per staff with two independent voices per layer
■	1 or 5 lines (plus tablature)	5 lines (plus tablature)		Number of staff lines per staff from 0 to 100
■	24 stave limit	8 stave limit	8 stave limit	Create any multiple of staves and measures up to 32,768
■	Standard only	Standard only	Standard only	Use standard or non-standard key signatures
■	Layers, 2nds, and unisons	Layers, 2nds, and unisons	Layers, 2nds, and unisons	Automatically avoid collisions of mid-score and mid-measure clefs, 2nds, and unisons when using layers
■	■	■	■	Play any range of measures at a specified tempo with on-screen Playback Controls
■	■	■	■	Set-up Wizard automatically assigns General MIDI patches and channels
■	■	■	■	Easily set up key and time signatures using the Set-up Wizard
■	■	■	■	Automatic final barline
■	■	Page View only	Page View only	View a score in either scroll view (continuous staff) or page view
■	■	Page View only	Page View only	Scroll music on-screen during playback in page or scroll view
■	2-3 voice harmonies	2-3 voice harmonies		Band-in-a-Box Auto Harmonizing automatically adds two to six-part harmonies of selected styles
■	■	Limited		Drum Groove creates custom drum parts instantly
■	■	■		Control the distance between a staff system and the staff system above
■	■	■		Enter an unlimited number of notes per measure
■	■	■		Control stem direction individually
■	■	■		Control the number of measures in each staff system
■	■	Transpose		Transpose using chromatic, diatonic, enharmonic or modal methods
■	■	■		Transpose, rebar, or rebeam music with single commands
■	■	■		Instantly switch views between the score and individually linked parts
■	■	■		Use on-screen rulers to position score elements
■	■	■		Add graphic repeat signs and text repeat markings
■	■	■		Reduce a score, page, staff system, note group or single note down to 5%, or enlarge it up to 999%
■	■	■		Extract individual parts from a score, with separate page layout control for each part
■	■	■		Adjust measure widths
■	■	■		Choose from over 30 pre-designed score templates to help you quickly prepare professional scores
■	■	■		"Optimize" the conductor's score by hiding empty staves
■	■	■		Automatic on-screen range checking
■	■	■		Create mid-measure clefs
■	■	■		Save multiple MIDI/instrument setups
■	■	■		Re-quantize any notes in any region entered from any note entry method
■	■	■		Protect scores with automatic backup
■	■	■		Capture music as you play, then convert to notation later Record one "track" while playing back others
■	■	■		Define your own noteheads; change the shape of any notehead
■	■	■		Specify separate time signatures for display and beaming control
■	■	■		Use different time and key signatures in each staff
■	■	■		Latin percussion rhythms included
■	■	■		Explode* scores to create instant orchestrations
■	■	■		"Implode" scores to create instant piano reductions
■	■	■		Add Cue Notes - easily place cue notes on any staves in any layer at any percentage
■	■	■		Align/Move Dynamics - vertically align all selected dynamics, expressions and hairpins
■	■	■		Automatic Barlines - place double-barlines automatically before all key changes and a final barline at the end of the score
■	■	■		Automatic Dynamics Placement - automatically places dynamics on the score based on MIDI key velocity
■	■	■		Canonic Utilities - transforms the selected region using inversion, retrograde, transposition or any combination of these
■	■	■		Cautionary Accidentals - allows various forms of cautionary accidentals added to your score including display on all notes
■	■	■		Change Fonts - Change fonts globally for text blocks, staff names, group names and lyrics
■	■	■		Change Stem Direction - changes the stem direction of notes on the middle staff line to follow the direction of the melodic line
■	■	■		Change to Default Whole Rests - allows you to change all the whole measure rests in the selected region to default rests
■	■	■		Change to Real Whole Rests - allows you to change all the default measure rests in the selected region to real whole rests
■	■	■		Check Range - verifies the selected instruments range with setting for beginner, intermediate and advanced players
■	■	■		Check Region for Durations - checks the selected region for any measures that have too few or too many beats
■	■	■		Clear Lyric Positioning - will reset any changes you've made to your lyric baselines in the selected region
■	■	■		Clear Measure # Positioning - clears all measure number positioning in the selected region and sets it to the default position
■	■	■		Common Tone Transposition - creates a series of transpositions where one note is equal to one note of the original chord
■	■	■		Easy Harmonics - string harmonics fast and easy
■	■	■		Easy Tremolos - create tremolos for display and playback
■	■	■		Find Range - Run this plug-in to find the highest and lowest notes in the selected region
■	■	■		Global Staff/Group Attributes - Apply the same staff or group attributes to any staves or groups
■	■	■		Handbells Used Chart - instantly creates a chart based on note usage
■	■	■		Latin Percussion - automatically adds pre-created Latin percussion grooves in a variety of styles
■	■	■		Mid-Measure Repeats - automates the process of creating repeats in the middle of a measure
■	■	■		Move Rests - lets you move rests in the selected region to a different vertical position
■	■	■		Number Repeated Measures - Place numbers over measures that are repeated again and again
■	■	■		Piano Reduction - creates a piano reduction of the selected staves
■	■	■		Rhythmic Subdivisions - Change the selected region to eighth notes, or divide all your notes in half
■	■	■		Single Pitch - changes all the notes in your selected region to the specified pitch
■	■	■		Smart Playback - adds a playback effect to glissandi, hairpins and trills
■	■	■		Space Systems - automatically positions your staff systems evenly on each page
■	■	■		Split Point - lets you reset the split point between two staves in the selected region
■	■	■		Tie Common Notes - inserts a tie between any two successive notes if the notes have the same pitch
■	■	■		Update Brackets & Groups
■	■	■		Vertical Collision Remover
■	■	■		Voice 2 to Layer - moves Voice 2 entries to the selected layer
■	■	■		Word Extensions - add or remove word extensions to and from your lyrics
■	■	■		Split Point - lets you reset the split point between two staves in the selected region

## Composing and Arranging Time Savers - Continued

Tie Common Notes - inserts a tie between any two successive notes if the notes have the same pitch  
 Update Brackets & Groups  
 Vertical Collision Remover  
 Virtual Fundamental Generator - automatically gives the appropriate "root" for any selected group of staves  
 Voice 2 to Layer - moves Voice 2 entries to the selected layer  
 Word Extensions - add or remove word extensions to and from your lyrics

## Features for Production/Sequencing

Before only

Mixer only

Before only

Mixer only

Before only

ReWire Support - Synchronize Finale playback with other pro-level audio applications  
 Quantize before or after opening  
 Import MIDI data  
 Read and write standard MIDI files  
 Import and export XML files, such as SharpEye scanning files  
 Notate while playing back other staves - sequencing  
 Record and play with a resolution of 1024 pulses per quarter note  
 "Minimize Rests" - give notes full value even if played too short so that unwanted rests never appear  
 Key sequencer features provided, including an integrated mixer  
 MIDI Tool offering full MIDI editing  
 Edit individual MIDI events in a graphic window  
 Define two sets of 16 MIDI channels and up to 64 instruments  
 Record an audio track or import an audio file  
 TempoTap® - lets you create tempo nuances by tapping your finger  
 Send SMPTE/MTC time code  
 Insert and display time code

## Finishing Touches

PDF, PNG, BMP, GIF,
