

## change the way your students practice

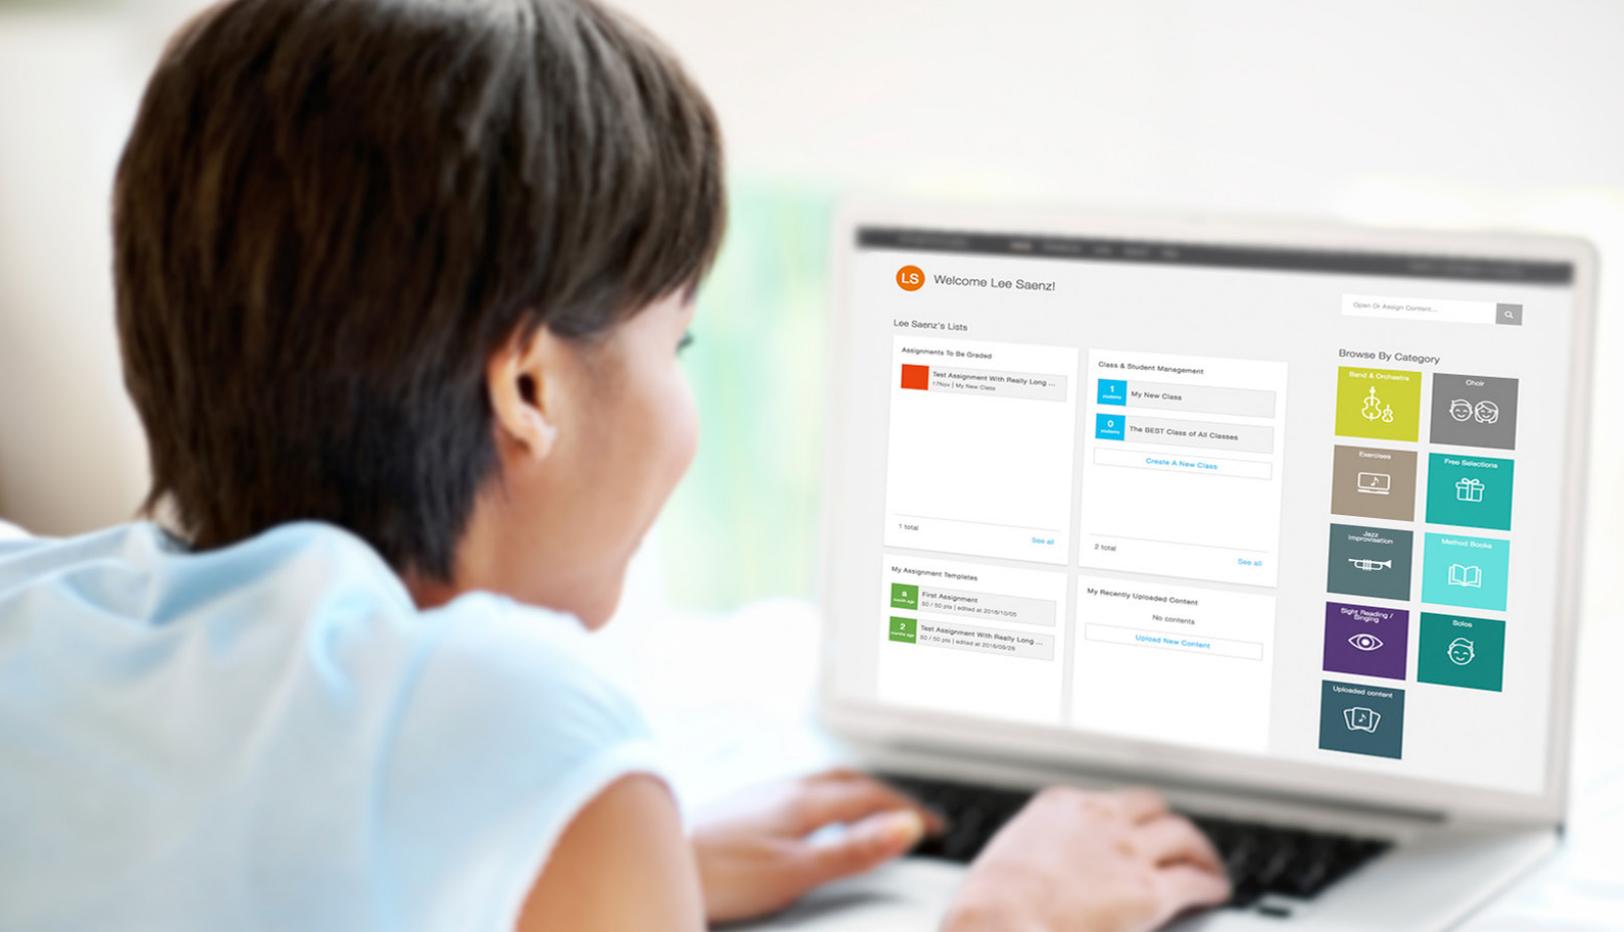

The new SmartMusic is here. And it's ready to help you facilitate the participation of every student. To help you inspire them. To help you take them further on their musical journey. To change passive repetition into active learning.

The new SmartMusic isn't an update; it's actually an all-new product with new benefits, as well as many of the great features educators have relied on for years.

### **What's new? Connecting with every student.**

The new SmartMusic helps create a level playing field for every student in two ways. First, it works on the most popular devices, including Chromebooks and iPads. Second, it's priced to help you achieve the dream of full classroom coverage: Teach Free offers a no-cost introduction to SmartMusic, and Teach adds the vast SmartMusic accompaniment library for just \$399 a year (this includes up to 3 teachers and 50 students, and you can add teachers and students to fit your program).

teach free  
experience smartmusic

\$0  
/year

**teach free** provides access for an unlimited number of teachers and students.

**access includes:**

- Content from the free library
- Inspiring accompaniment with professional audio tracks
- The ability to:
  - Create and send assignments
  - Hear student recordings
  - Document progress in your gradebook

teach  
add the world's greatest music, starting at

\$399  
/year

**teach** provides access for 3 teachers and 50 students; additional teachers and students can be added inexpensively to suit any sized program.
