

Change the way your child practices

Discover music

Find music that inspires and play with brilliant accompaniment. Your child will have access to over 200 method books, 5,000+ solo and ensemble titles and thousands of exercises.

Improve

Immediate feedback provides guidance on what pitches and rhythms are hit or missed so students know what to work on. Correct notes and rhythms appear in green and areas for improvement are red. See a score based on correct notes and rhythms.

Play

Feel what it's like to be a part of the band, whether your stage is in the garage or Carnegie Hall. MakeMusic Cloud guides at home practice through teacher issued assignments. Students master difficult sections with adjustable tempo, practice loops, and fingering charts.

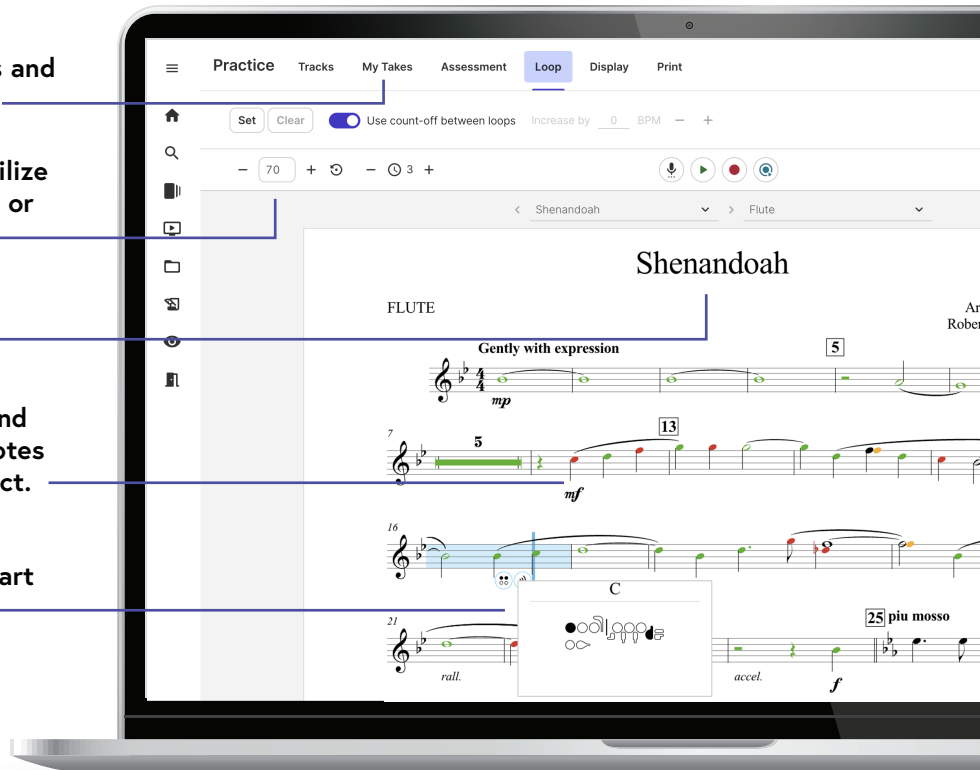

Students can record their assignments and send their best take to their teacher.

Adjust tempo, create practice loops, utilize the tuner, and listen to accompaniment or the part.

Practice exercises and songs from our expansive Music Catalog.

Red notes indicate an incorrect pitch and show which note was played. Yellow notes are early or late. Green notes are correct.

Click on a note to hear it or to see a chart with the correct fingering.

MakeMusic Cloud works on web-enabled computers and tablets, and is optimized for Chromebooks and iPads. Microphones and headphones are optional but recommended for the most accurate assessment.
